MUTHUKUMAR.S	muthusmart222@gmail.com
PRIYAN.A	priyanstar702@gmail.com

2. Project Overview

Purpose:

FitFlex is designed to help users achieve their fitness goals by providing personalized workout plans, exercise tracking, and progress monitoring. The platform offers intuitive navigation, motivating features, and insightful analytics to enhance the user's fitness journey.

Features:

- Personalized Workout Plans
- Exercise Category Filter (e.g., Strength, Cardio, Yoga, etc.)
- Progress Tracking and Goal Setting
- Daily Workout Reminders
- Interactive Workout Demonstrations
- Bookmark Feature for Favorite Exercises
- Light/Dark Mode for Improved User Experience
- Responsive Design for Mobile and Desktop

3. Architecture

Component Structure:

- App.js** — Root component that manages layout and routing
- Header.js** — Navigation bar with search functionality
- WorkoutList.js** — Displays categorized workout plans
- WorkoutCard.js** — Individual workout details with instructions
- WorkoutDetails.js** — Displays step-by-step workout guidance
- Footer.js** — Provides useful fitness tips and motivational quotes

State Management:

- Context API — Manages global states like theme preferences, saved workouts, and progress tracking

Routing:

- React Router — Used for seamless navigation across categories, workout details, and user profile

4. Setup Instructions

Prerequisites:

- Node.js (v18 or higher)
- npm or yarn

Installation:

1. Clone the Repository:

```
""  
git clone https://github.com/darunraj0071/fitflex-app.git  
cd fitflex-app  
""
```

2. Install Dependencies:

```
""  
npm install  
""
```

3. Create `.env` file:

```
""  
REACT_APP_FITNESS_API_KEY=your_api_key_here  
""
```

4. Run the Application:

```
""  
npm start  
""
```

5. Folder Structure

```
/src
├── /components
│   ├── Header.js
│   ├── WorkoutList.js
│   ├── WorkoutCard.js
│   ├── WorkoutDetails.js
│   └── Footer.js
├── /pages
│   ├── Home.js
│   ├── Categories.js
│   ├── ProgressTracker.js
│   └── Profile.js
├── /assets
│   ├── images
│   ├── icons
│   └── styles
├── /utils
│   ├── api.js
│   ├── helpers.js
│   └── constants.js
├── App.js
└── index.js
```

6. Running the Application

Frontend Server Command:

```
``` bash
npm start
```
```

7. Component Documentation

Key Components:

Header: Provides navigation and search functionality

WorkoutList: Displays workout plans categorized by type

WorkoutCard: Shows workout details such as steps, duration, and tips

WorkoutDetails: Provides detailed instructions, video demos, and progress tracking

Reusable Components:

Button Component: Used for 'Start Workout,' 'Save Plan,' or 'Track Progress' actions

Modal Component: Displays workout instructions in a popup

8. State Management

Global State:

- Managed using **Context API** for workout tracking, theme settings, and reminders

Local State:

- Managed via React's `useState()` for dynamic UI elements like forms and pagination

9. User Interface

- Clean, modern interface designed for fitness enthusiasts
- Motivational quotes and tips integrated throughout the platform
- Dynamic progress bars and goal trackers for better visualization

10. Styling

CSS Frameworks/Libraries:

- **Tailwind CSS** — Used for fast, scalable, and responsive design

Theming:

- Integrated Light/Dark Mode for improved user comfort

11. Testing

Testing Strategy:

Jest — For unit testing of components

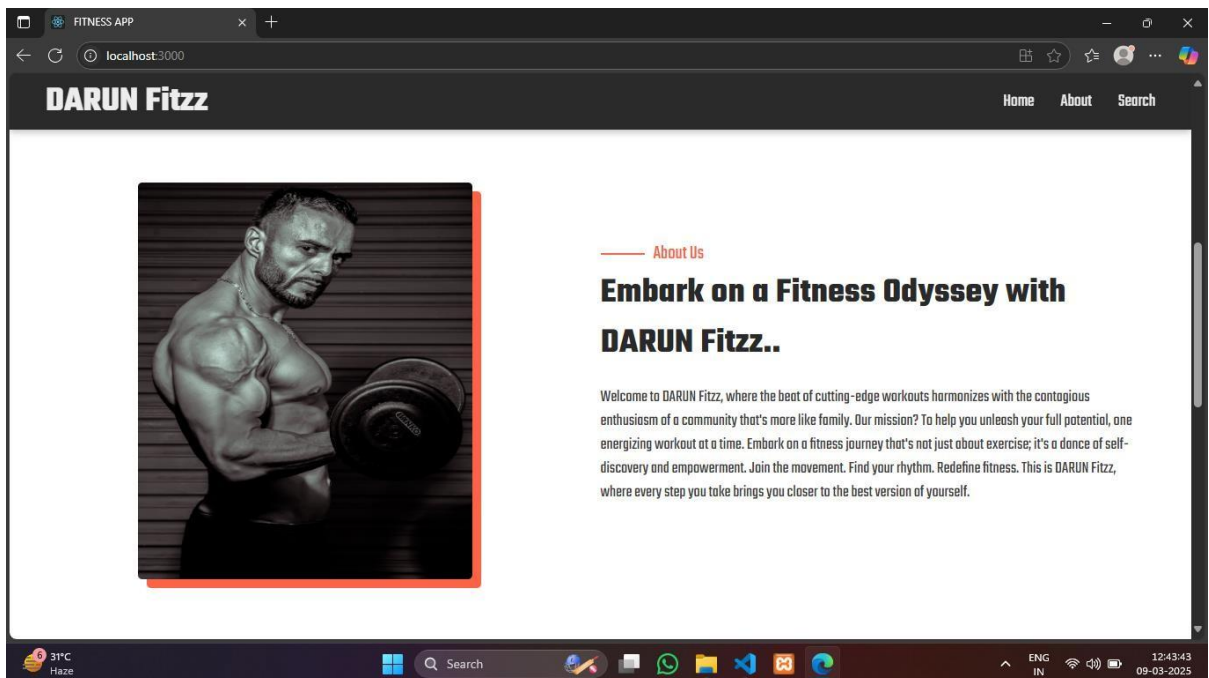

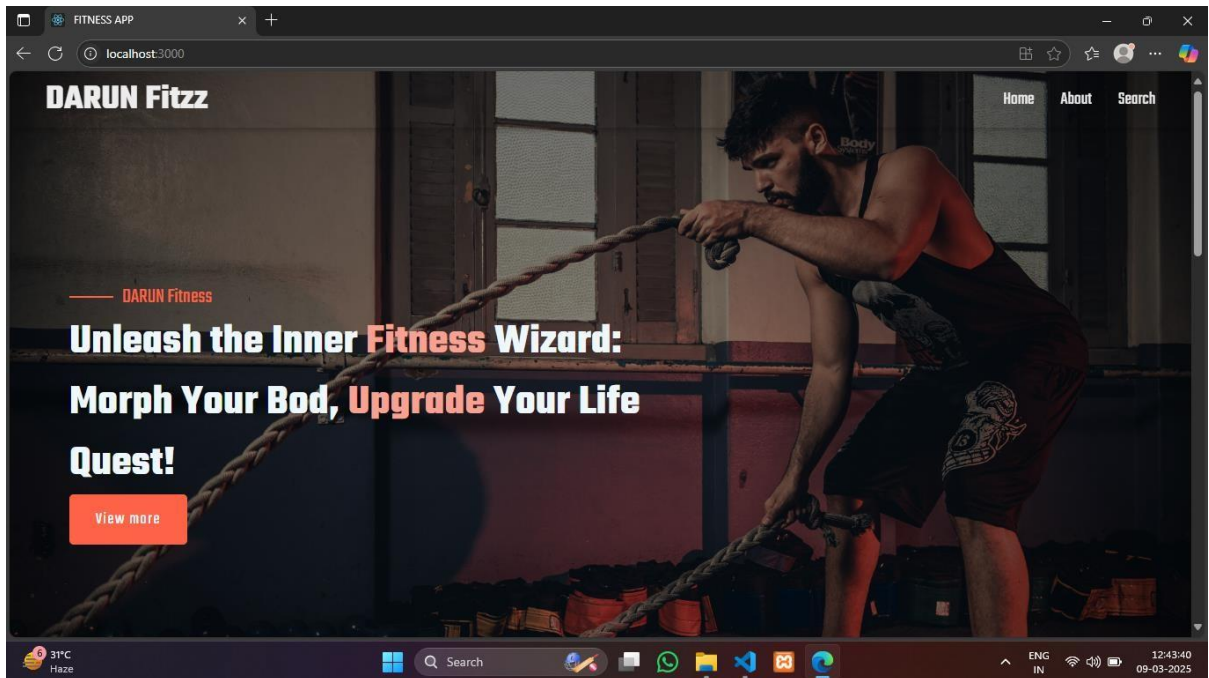

React Testing Library — For integration and user interaction testing

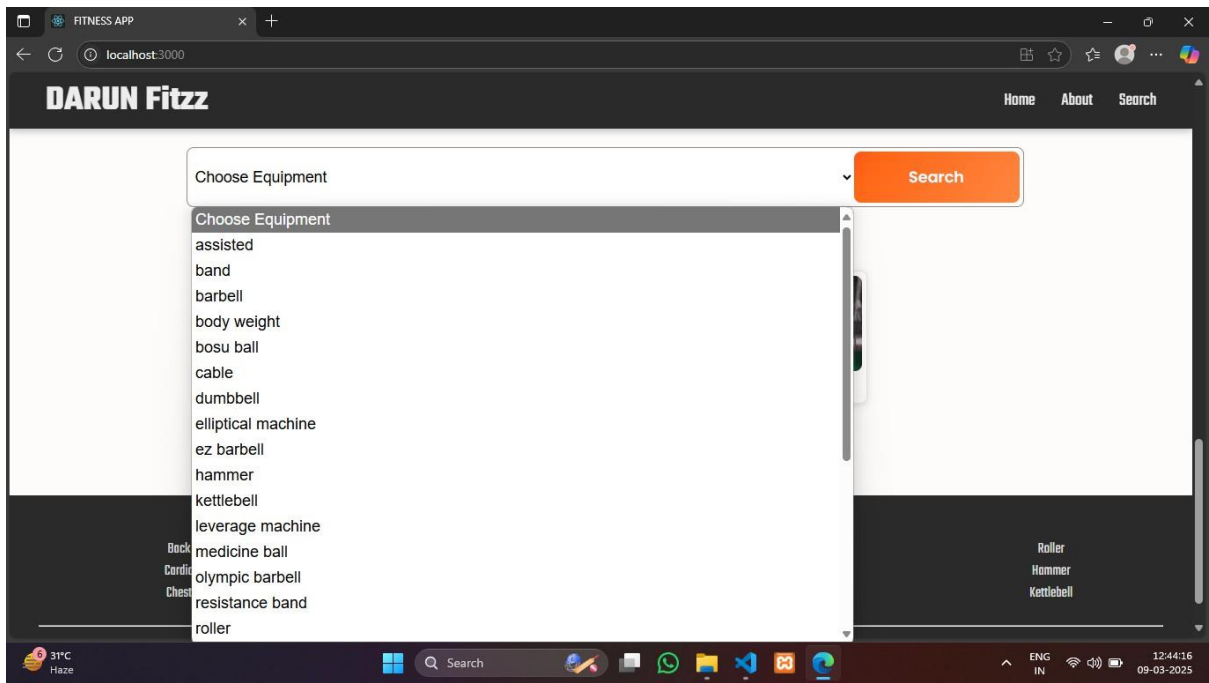

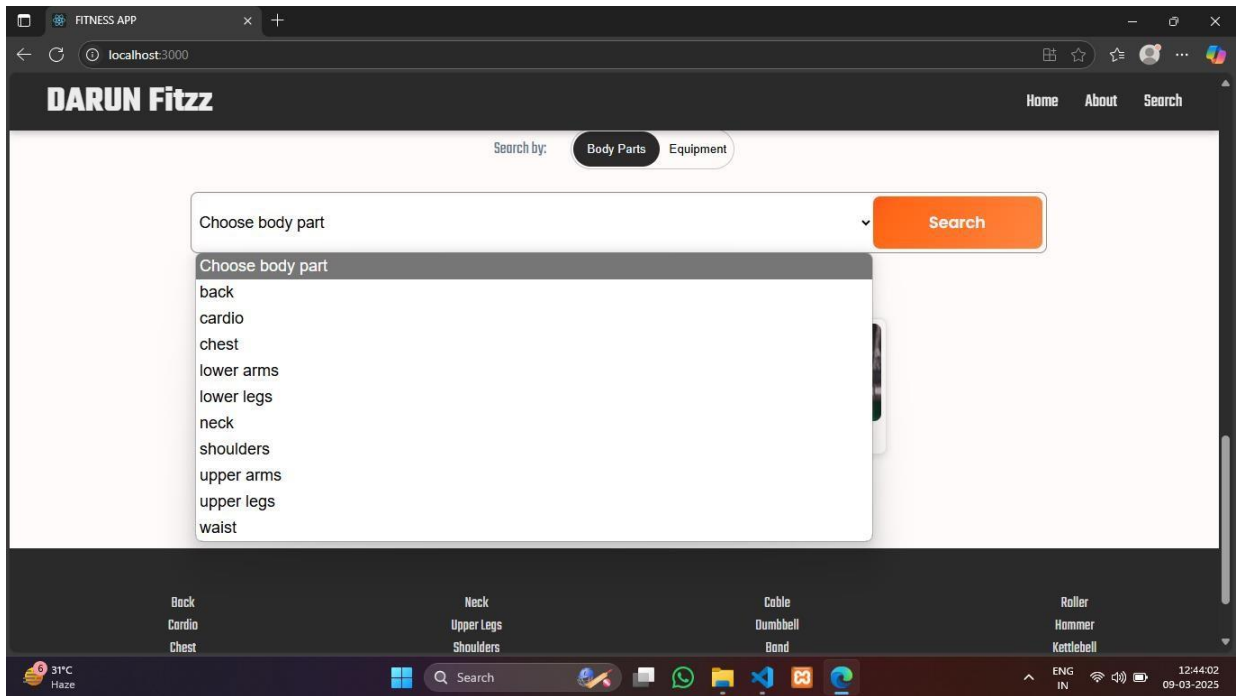

Code Coverage:

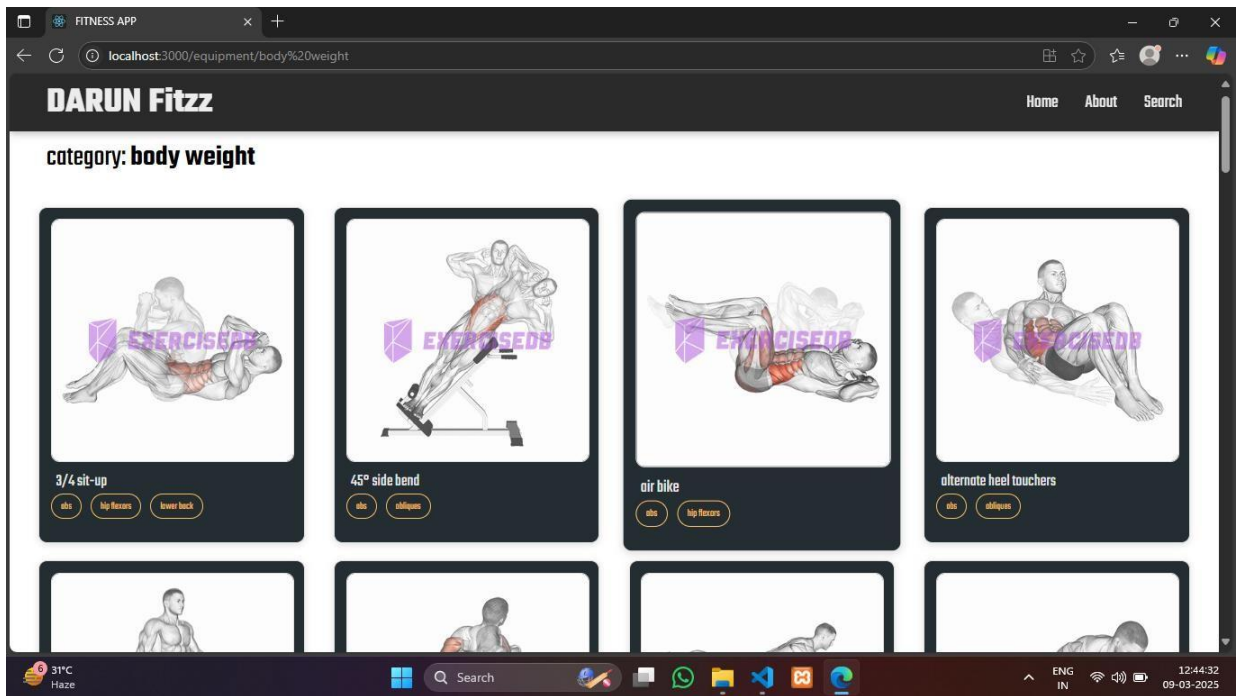

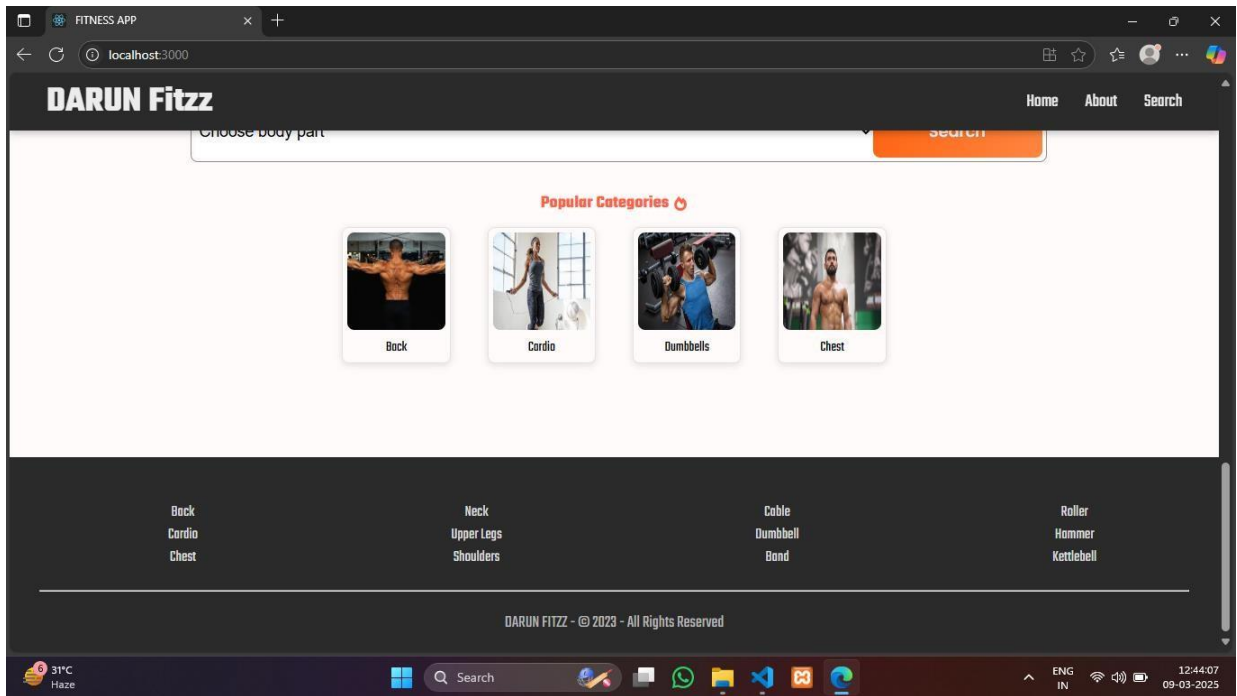

- Ensured high test coverage with Jest reports

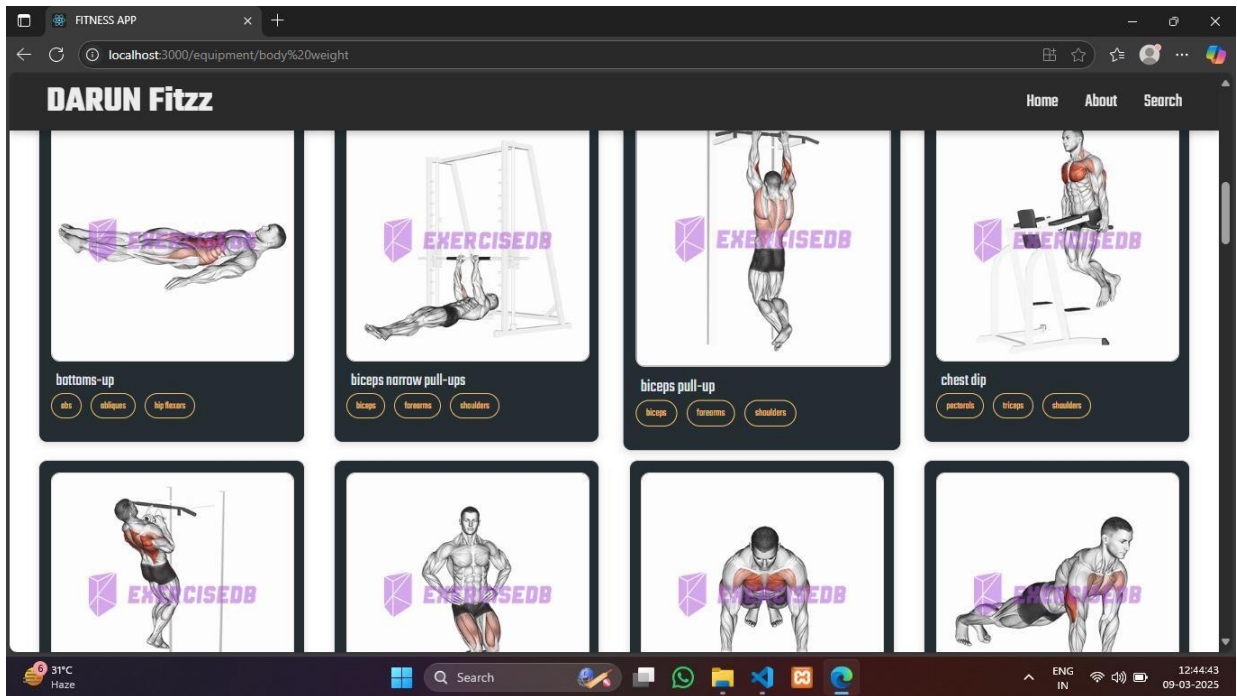

12. Screenshots or Demo

Screenshot:

Live Demo Link:

13. Known Issues

- Some animations may lag on older devices
- Progress tracking may require additional optimization for large data entries

14. Future Enhancements

- Social Sharing for Workout Achievements
- Custom Workout Creator with Drag-and-Drop Interface
- Integration with Smartwatches for Real-Time Activity Tracking
- Personalized Diet Recommendations Based on Workout Progress
